SUMMARY

Aspiring Java Backend / Full-Stack Engineer with 3 deployed production apps; built for 100+ users. Seeking a backend/full-stack internship to deepen system design skills.

EDUCATION

Computer Science & Engineering
Indus University
Ahmedabad

CGPA
9.03 / 10

- Pursuing (7th Semester)

TECHNICAL SKILLS

Languages

Java (Core)	Python	
JavaScript	C/C++	SQL
HTML5	CSS3	

Backend Frameworks

Spring Boot	Flask
-------------	-------

Databases

MySql	MongoDB
PostgreSQL	

Developer Tools:

Git	GitHub	VS Code
-----	--------	---------

PROJECTS

PulseSync | Full-Stack Healthcare Platform

Links: <https://github.com/mayurparmar2005/PulseSync-Hospital-System>

Tech Stack: Java, Spring Boot, MongoDB, REST APIs, BCrypt

- Developed a backend system using **Spring Boot** and **Java** to automate patient registration and appointment scheduling.
- Designed and implemented secure **REST APIs** to manage doctor availability and patient records efficiently.
- Utilized MongoDB's flexible document structure to efficiently store and retrieve nested medical records and patient consultation history.
- Created user authentication logic to allow separate dashboard views for patients and doctors.

LIBQ | Digital Platform for Library Science

Links: <https://github.com/mayurparmar2005/LIBQ> | **Live:** libq.co.in

Stack Used | Python, Flask, HTML5/CSS3, JavaScript, PostgreSQL, Render, GoDaddy

- Designed and engineered a dedicated, national knowledge portal for Library and Information Science professionals.
- Developed a dynamic job portal with live search, deadline tracking, and interactive community discussion forums.
- Successfully deployed the application on cloud infrastructure, scaling it to over 100 active live users.

FixBuddy | On-Demand Home Services Marketplace

Links: <https://github.com/mayurparmar2005/Fix-Buddy> | **Live :** <https://fixbuddy04.pythonanywhere.com>

Tech Stack: Python, Flask, MySQL, JavaScript, SMTP, PythonAnywhere

- Engineered an end-to-end marketplace featuring independent dashboards for Customers, Employees, and Admins.
- Built an expandable shopping cart with real-time calculations and integrated the Razorpay API for secure payments.
- Configured automated booking confirmations and secure password resets using Flask-Mail and Gmail SMTP.
- Secured the application with PBKDF2 hashing and deployed the full-stack production environment on PythonAnywhere.

EXTRACURRICULARS & HOBBIES

Hackathon (Odoos Hackathon)

Participated in the Odoos Hackathon, collaborating under tight deadlines to design and prototype software solutions.

Project Leadership

Acted as Group Leader for multiple academic and development team projects, coordinating tasks, and ensuring timely milestone deliveries.

UI/UX Exploration

Enjoy experimenting with digital layouts and exploring user interface design principles to bridge the gap between clean code and user experience.
